

FUKEYHA RIZWAN

Computer Science Undergraduate at NED University Of Engineering & Technology

✉ fukeharizwan2003@gmail.com 📞 +92 370 2171598 🔗 linkedin.com/in/fukeyha-rizwan

Python-focused developer with hands-on experience in building full-stack web applications (Laravel, Django), AI-powered systems, and real-world problem-solving projects. Strong interest in integrating machine learning with software engineering to build impactful products.

» 📁 Experience

Frontend / Backend Developer Intern

Karachi

Fossporus LLC

April 2025 – Oct 2025

- › Developed and maintained web applications using Laravel and frontend technologies.
- › Worked on real-world client projects involving UI improvements and backend logic.
- › Collaborated with team members using Git and agile workflows.

IT Intern

Karachi

KDA (Karachi Development Authority)

March 2025 – April 2025

- › Assisted in IT operations and system handling.
- › Gained exposure to real-world software systems and workflows

» </> Projects

- SmartSight — AI Assistive Glasses (Final Year Project)** *Python, OpenCV, Text-to-Speech*
 - › Building an AI-powered system to help visually impaired individuals identify products.
 - › Implemented barcode detection with voice feedback and real-time guidance system.
 - › Designed multi-mode scanning logic (search, alignment, rotation, scan)
 - › Integrated local product database with fallback manual entry
- AKT Examination Management System** *PHP, MySQL, JavaScript*
 - › Developed a complete system for managing exam batches, users, and forms.
 - › Implemented role-based authentication and admin panel.
 - › Built dynamic batch creation and exam form handling system
- Fashion Inventory Intelligence System** *Django, Machine Learning*
 - › Built a system for predicting product demand using ML models.
 - › Implemented forecasting (trend + seasonality) and risk alerts.
 - › Designed dashboard with KPIs and insights
- Invoice Management System** *JavaScript*
 - › Developed a dynamic invoice generator with tax calculations
 - › Implemented inclusive/exclusive tax logic and print-ready invoices

» ⚙️ Technical Skills

- › **Languages:** Python, PHP, JavaScript, C, C++, SQL
- › **AI / ML :** TensorFlow, Scikit-learn, Machine Learning, Data Preprocessing, Forecasting Models, OpenCV, NumPy, OpenCV, Semantic Models, Information Retrieval, Supervised & Unsupervised Learning
- › **Web Development:** Laravel, Django, HTML, CSS, JavaScript, Bootstrap, REST APIs

› **Databases:** MySQL, SQLite

› **Tools & Platforms:** Git, GitHub, VS Code, Jupyter Notebook, Google Colab

» **Education**

BS in Computer Science & Information Technology

Expected June 2026

NED University of Engineering & Technology

» **Leadership & Activities**

- › Led multiple academic and technical projects with team coordination.
- › Worked on real-world systems involving backend + frontend integration
- › Actively exploring AI + Software Engineering integration for future career

» **Certifications & Awards**

1. Completed Data Science course (Udemy)
2. Built multiple ML and web-based projects
3. Hands-on experience with real-world development (internships + projects)
