

# FUKEYHA RIZWAN

Computer Science Undergraduate at NED University Of Engineering & Technology

✉ fukeharizwan2003@gmail.com    📞 +92 370 2171598    🔗 linkedin.com/in/fukeyha-rizwan

Full-stack web development, AI-powered systems, and digital product design. Skilled in Laravel, Django, JavaScript, and machine learning workflows with a strong interest in building scalable, user-focused software products.

## » 📁 Experience

### Graphic Design & Social Media Design

Remote

Freelance / Portfolio Projects

- › Designed modern promotional creatives for SaaS products, startups, restaurants, and social media campaigns.
- › Created branding-focused visual content using Canva and modern design principles.
- › Built creative assets for product launches, startup branding, and promotional campaigns.

### Full-stack Developer

Karachi

Fossporus LLC

- › Developed and maintained web applications using Laravel and frontend technologies.
- › Worked on real-world client projects involving UI improvements and backend logic.
- › Collaborated with team members using Git and agile workflows.

### IT Intern

Karachi

KDA (Karachi Development Authority)

March 2025 – April 2025

- › Assisted in IT operations and system handling.
- › Gained exposure to real-world software systems and workflows

## » </> Projects

- SmartSight — AI Assistive Glasses (Final Year Project)** *Python, OpenCV, Text-to-Speech*
  - › Building an AI-powered system to help visually impaired individuals identify products.
  - › Implemented barcode detection with voice feedback and real-time guidance system.
  - › Designed multi-mode scanning logic (search, alignment, rotation, scan)
  - › Integrated local product database with fallback manual entry
- AKT Examination Management System** *PHP, MySQL, JavaScript*
  - › Developed a complete system for managing exam batches, users, and forms.
  - › Implemented role-based authentication and admin panel.
  - › Built dynamic batch creation and exam form handling system
- Fashion Inventory Intelligence System** *Django, Machine Learning*
  - › Built a system for predicting product demand using ML models.
  - › Implemented forecasting (trend + seasonality) and risk alerts.
  - › Designed dashboard with KPIs and insights
- Invoice Management System** *JavaScript*
  - › Developed a dynamic invoice generator with tax calculations

- › Implemented inclusive/exclusive tax logic and print-ready invoices

## » Technical Skills

---

- › **Languages:** Python, PHP, JavaScript, C, C++, SQL
- › **AI / ML :** TensorFlow, Scikit-learn, Machine Learning, Data Preprocessing, Forecasting Models, OpenCV, NumPy, OpenCV, Semantic Models, Information Retrieval, Supervised & Unsupervised Learning
- › **Web Development:** Laravel, Django, HTML, CSS, JavaScript, Bootstrap, REST APIs
- › **Design & Creative:** Canva, Social Media Design, Branding, Typography, Layout Composition, UI Design Principles
- › **Databases:** MySQL, SQLite
- › **Tools & Platforms:** Git, GitHub, VS Code, Jupyter Notebook, Google Colab

## » Education

---

**BS in Computer Science & Information Technology**  
NED University of Engineering & Technology

*Expected June 2026*

## » Leadership & Activities

---

- › Led multiple academic and technical projects with team coordination.
- › Worked on real-world systems involving backend + frontend integration
- › Actively exploring AI + Software Engineering integration for future career

## » Certifications & Awards

---

1. Completed Data Science course (Udemy)
2. Google AI Professional Certificate — Coursera & Google
3. Hands-on experience with real-world development (internships + projects)
